US9a	Edit a logged donation: Given a donor owns a donation that is still queued or matched, when they change the food lines, quantity, expiry, or pickup window, then PATCH /api/donations/:id saves the log, restores the previous food-bank capacity, and runs matching again. After picked_up or delivered, the edit is locked with 409.	Build donor edit form at /donations/[id]/edit	PRATANIN KAHTEPMUD	To-Do	6	3	3	0	0	0	0	0	0	0	0	0	0	0	0	0

US9b	Send one log to many food banks: Given a donor puts one or more foods on a single donation, when splitAcrossBanks is true and the total kilograms exceed one bank, then proposeMatches assigns quantityKg across every in-range bank that still has room, and the sum of quantityKg equals the donation quantity.	Add multi-food lines and the split checkbox on the donor form	PRATANIN KAHTEPMUD	To-Do	6	0	0	3	3	0	0	0	0	0	0	0	0	0	0	0

US3b	Expiry alerts at 24, 12, and 2 hours: Given a logged donation, when hours until expiry cross 24, 12, or 2, then a notification is stored for staff and for drivers and shown on /notifications.	Build 24/12/2 hour expiry notification job	JIRATHIWAT SUNTIPREEDATHAM	To-Do	6	0	0	0	0	3	3	0	0	0	0	0	0	0	0	0

US4a	Operations dashboard: Given a signed-in user opens /dashboard, when they filter by donor, food bank id, or status, then GET /api/dashboard shows open, matched, picked up, delivered, and urgent counts.	Build operations board filters	PRATANIN KAHTEPMUD	To-Do	6	0	0	0	0	0	0	2	2	2	0	0	0	0	0	0
