TDD Test Report

Team QWERTY. Rescue ERP, Sprint 2. Submit this report with the final presentation on Friday 13 November 2026.

Today is Friday 6 November 2026, Sprint Day 3. From this standup on, "What will I do next?" is a test case: number, name, and expected output.

Red means the test is not written, or it fails. Write it before the code. Green means the test passed on a run dated in this report. Yellow means the test is already in qa/api from earlier work and must be run again on Day 3 before anyone calls it Green.

The printable copy of the instructor template is docs/sprint-2-tdd-report.docx.

How a case moves

1. The owner names the case in the standup (Red).
2. Sakkaraj or the owner adds it under qa/api and runs it. A failure is still Red. That is the point of TDD.
3. The smallest code change makes it pass (Green).
4. If the screen exists but there is no pytest yet, the row stays Yellow.
5. Napat does not move the story to Done while any of its rows are Red.

Run, with the app on http://localhost:3000:

powershell
.\.venv\Scripts\python.exe -m pytest qa\api -q

Cases spoken on Friday 6 November (Day 3)

TC-US9a-01 Edit before pickup

Dev: Sakkaraj. File: qa/api/test-zz-donor-edit-split.py.

Red: not re-run this morning.

Green: last full qa/api run passed this function. Re-run on Day 3 before calling it Green.

Yellow: the test is already in the file. Today's job is to run it.

TC-US9a-02 Reject edit after pickup

Dev: Sakkaraj.

Red: there is no test yet. Expected result is HTTP 409. This is what Sakkaraj does next.

Green: empty until the new test passes.

Yellow: do not use Yellow to skip writing the test.

TC-US9a-03 Reject edit by another role

Dev: Jirathiwat.

Red: no test yet. Expected result is HTTP 403.

Green: empty.

Yellow: empty.

TC-US9a-04 Hide edit after delivery

Dev: Pratanin.

Red: manual check not done today. Expected: the list says Locked.

Green: empty.

Yellow: empty.

TC-US9b-01 Second food on the same log

Dev: Pratanin.
