NAPAT TAYOMMAI 0:07

Hello, everyone. This is our first for the meeting. I hope you get some point after this meeting. OK, let's start with our sprinkle. It's the the coordination for end to end and a donator catalog.

supply food with a hook up window and system can affect the urgent attempt and auto match the donation of food bank and driver pick up and deliver and trap with the proof and automated receipt. I think that's all for our sprinkle. We want to go next.

JIRATHIWAT SUNTIPREEDATHAM 0:48

OK, for me, OK, far on my card, I did read the s s 10th criteria and user story, so I will start developing the donation queue indication back end logic, and I have found that several risks. The first is the unclear message format.

The exact payroll hasn't been decided yet, and I have to be aware of the risk of saving duplicate donation. That's all my parts, everyone else.

PRATANIN KAHTEPMUD 1:22

Yeah, so I have read the Sprint plan. I will be starting on building the donation entry from UI logic for log in the donation. The risk I have determined is input validation and the error message. Yes.

SIRAPASSORN POKASERMSONG 1:40

So, for me, I will be working in parallel with the team on the development test. I will focus on implementing the requirements and making sure that the data is processed correctly.

Anyone else?

SAKKARAJ TUVAJIT 1:55

Okay, so for the testing part, I have some test case for donation ingestion and entry form, and today I will prepare a test data on my Registrar. I can test until there's a working view or a way to send messages into the queue, and that's all for the testing part.

NAPAT TAYOMMAI 2:17
Okay, that's good. For everyone, anything you want to add or any help that you need.

PRATANIN KAHTEPMUD 2:26
Yeah.

SAKKARAJ TUVAJIT 2:26
No.

NAPAT TAYOMMAI 2:27
Oh, okay. Feel free to contact me directly if you found some. I think that's all for the meeting. I hope you update the progress of the work daily, and if you need some help, you can contact me directly.
That's all. Thank you.

SAKKARAJ TUVAJIT 2:47
Thank you.

JIRATHIWAT SUNTIPREEDATHAM 2:48
Thank you.

PRATANIN KAHTEPMUD 2:48
Thank you.

NAPAT TAYOMMAI 2:48
Never.
